Priority Care Facility Opening Winter 2010

Sometimes there are twists and turns in our health care that require special attention. That's why Heritage Victor Valley Medical Group is opening a Priority Care facility this fall, offering a new Specialized Services Program.

"We realize that primary care physicians and their patients can sometimes be overwhelmed with the demands of complex medical problems," said Dr. Ramesh Bambhania, M.D., a board-certified Internist leading the Specialized Services Program.

Dr. Bambhania goes on to say, "These medical problems frequently require multiple visits to different specialists and testing facilities.

Our new facility will be designed to help coordinate complex medical care and will be staffed by an experienced physician and case managers."

The goal of Priority Care is to improve access to physician services for the members who need it most. "We hope to prevent unnecessary and often frustrating visits to the ER and other acute care facilities," added Dr. Bambhania. The Specialized Services Program is by physician-referral only.

Priority Care will be located next to the Heritage Victor Valley Medical Group office which opened in January 2008, at 12408 Hesperia Road, Suite 2, in Victorville.
